### Evaluation of patella luxation

Only results from dogs age 12 months or more can be registered with DKK. The examination should be performed with the dog standing on a table. The patella is placed between tumb and inext finger. The rear leg should be stretched but not overstretched. Mobility of the patella is assessed by a light pressure both laterally and medially. If the patella can be pushed over/outside trochlea it is considered luxated. When scoring the luxation the knee should be bent and stretched within the physiological limits. Sedation should be avoided due to slackness of the knee.

Scoring. (Please mark with a X)

Date of examination: 05/05/2017

Grade	Normal	Right		Left	
		Lateral	Medial	Lateral	Medial
Grade 0	Normal	X		X	
Grade 1	The patella is in place but can be luxated manually and returned to normal position spontaneously.				
Grade 2	The patella can be luxated slightly either manually or spontaneously. Remains mainly luxated but can be reset.				
Grade 3	The Patella is permanently luxated and cannot be reset				

### Dyrlæges underskrift og stempel

Mørkøv Dyreklinik

Dato / date Underskrift og stempel / Veterinarian's signature and stamp

Ovennævnte dyrlæge bekræfter med sin underskrift, at identiteten for ovenstående hund er kontrolleret ved aflæsning af ID-nummer på hunden. Ovenstående dyrlæge bekræfter samtidig med sin underskrift at der har/hende bekendt, ikke er foretaget operativt indgreb for HD/AD/OCD.

With his/her signature the above veterinary surgeon confirms that the identity of the above dog has been controlled by reading the dog's ID number. At the same time, the above veterinary surgeon confirms with his/her signature that he/she is not aware of any surgical interventions for HD (hip dysplasia), ED (elbow dysplasia) or OCD (osteochondritis dissecans) performed on the dog in question.

### Ejers underskrift

Dato Underskrift

Resultatet af sundhedsundersøgelsen skal indsendes til DKK. Resultatet offentliggøres på [www.hundeweb.dk](http://www.hundeweb.dk) og DKK kan videregive resultatet til brug i avlsrelateret arbejde eller i statistisk og videnskabeligt øjemed. HD/AD/OCD billeder er DKK's ejendom.

The result of the health examination must be sent to the DKK. The result is published at [www.hundeweb.dk](http://www.hundeweb.dk) and the DKK is allowed to reveal the result for purposes related to breeding, statistics or science. HD/AD/OCD pictures are the DKK's property

### Information og anvisninger

• DKK's "rekvisition" (denne blanket) udfyldes og underskrives af både hundeejer og dyrlæge
